A motivated programmer that specializes in building and maintaining codebases. Ambitious on facing problems head-on and learning new technologies. Determined to become a skilled Software Engineer.

TECHNICAL SKILLS

Frontend: HTML, CSS, JQuery, JavaScript, Bootstrap, Materialize, AJAX
Backend: MongoDB, Express, ReactJS, NodeJS, MySQL , Sequelize, NoSQL, Mongoose, Handlebars

PROJECTS

Recipe-App | GitHub: https://bit.ly/Recipe-Repo | LiveURL: https://bit.ly/Git-A-Recipe
- Description: Built a front-end application where a user is able to find an ideal dish of their choice which results in a recipe that includes ingredients, and calorie count shown in a modal once searched and found.
- Role: Frontend Styling, Error Handling "Zero-State function"
- Tools: HTML, CSS, JavaScript, Materialize, Server-Side API

BM Fragrances | https://bit.ly/Fragrance-Repo | LiveURL: https://bit.ly/BM-Fragrance
- Description: Built a full-stack web application where a user is able to create and log-in to their account. This application was built for a user who likes fragrances and is able to shop for perfumes or colognes. Future development involves creating a reviews section where the user can post and delete reviews.
- Role: Creating the Models & Seeds, Front-end styling, and the Controller.
- Tools: HTML, CSS, JavaScript, Bootstrap, Handlebars, MySQL, Heroku

EXPERIENCE

Red Lobster, Round Rock TX - *Server*   JULY 2013 - PRESENT
Served customers from all areas of the world in a high-paced, high-energy family dining restaurant.

Key Accomplishments:
- Manages up to 5 tables in a fast-paced environment while maintaining professionalism in order to provide exceptional service
- Became a certified trainer from showing good customer service and bringing sales to the company by upselling products.
- Trained new servers coming into the industry and got them fully trained before being on their own.
- Increases company profit through the upsell of certain products at an average $7 per table.

EDUCATION

The University of Texas at Austin - *Fullstack Web Development*   JANUARY 2022
